

SAINT LOUIS **BALLET**

***Swan Lake* Craft Project**

Make your own swan!

Materials: paper plate, scissors, glue, one googly eye, orange paper

Step 1: Cut from the edge through the middle of the plate. Once you get across to the other side, stop at the textured part, and cut around the rim, cutting all the way back to where you started. Keep the paper that you just cut out!

Step 2: To shape the head, cut the long piece into a rounded edge about an inch away from the “body”.

Step 3: To make the beak, cut the orange paper into a small, long triangle.

Step 4: Glue the eye and beak onto the head to make the face.

Step 5: To make the wing, take the extra paper that was cut off. Cut it down to a “wing” size, round one end, cut little slits on the other end, and glue it onto the swan’s side.

Step 6: As you let the glue dry, think of a name for your beautiful swan!
